### **Best Block Makes Its Mark on Iconic Projects and More**

More than 76 years ago, a small block company was created in Livonia, Michigan, to supply concrete masonry products to a post-World War II economy. Today, the Best Block Company, a fourth-generation family firm represents multiple architectural and residential brick lines, such as Brampton Brick, General Shale, Brick Craft, and Glen Gery. They are also the largest distributor in Michigan of Manufactured Stone Veneer products that include Cultured Stone®, Eldorado Stone®, Dutch Quality™ and StoneCraft™. Along with brick and MSV, they distribute thin and full depth natural stone, and inventory a complete line of masonry supplies to accompany all their products.

You will find Best Block products on some of Michigan's most iconic projects—from Ford Field, Comerica Park and Little Caesars Arena to multi residential buildings such as The Griffin and Residence at Chesterfield. They also work with many of the national hospitality brands such as Hilton, Holiday Inn and Springhill Suites.

Best Block has seen many changes within the industry over the years and applauds the MIM for the vital role it has played in helping its members keep up with those changes. Andy Pachota, president at Best Block, which has supported the mission of the Masonry Institute of Michigan for more than five decades, says, "The MIM is the premier state masonry educational and promotional service organization in the country whose impact is felt throughout the industry on a national level."
