

Bowerston Shale: Earth, Fire, Legacy

With plants based in Bowerston and Hanover, Ohio, the Bowerston Shale Company has produced quality clay products for the architectural, commercial and residential markets since 1929. Quality and customer service has been the foundation of the company. They continually incorporate the latest engineering and manufacturing techniques into their brick production.

Bowerston Shale believes in imagination and skill. They still consider brick making an art—blending the right raw materials to create the perfect color and texture—and use craftsmanship to produce unique shapes and everlasting impressions.

Bowerston Shale has been a trusted manufacturer for some of Michigan's most distinguished projects including the Michigan Manufacturers Association Headquarters in Lansing. This project highlights their ability to produce a wide range of colors—from a deep, rich range of browns to a warm grey accent. Custom-made radial shapes were produced to form the rounded corners of the building.

The company appreciates the MIM's unwavering support of the Michigan masonry industry. Bowerston Shale's Charlie Wiles, who has more than 40 years of experience in the brick industry, shares, "Knowing that the organization is committed to promoting masonry to Michigan's design professionals is key to Bowerston Shale's future in this thriving market."

Bowerston Shale is sold through a network of distributors throughout Michigan and the Midwest. For more information regarding Bowerston Shale products please contact Charlie Wiles at (616) 915- 4928 or CLW49002@gmail.com or visit www.Bowerstonshale.com.
