

## **Glen-Gery is Meeting the High-style Needs of Today's Architects, Designers and Homeowners**

Founded in 1890, Glen-Gery is a premier brick and stone manufacturer offering a diverse product portfolio of more than 600 brick and stone products. For more than a century, the company has provided high quality building products that meet both innovative design challenges and demanding construction specifications. Through technology advancements and product innovations, Glen-Gery is able to deliver a premium product line that caters to the high-style needs of today's architects, designers and homeowners. Today Glen-Gery, headquartered in Wyomissing, Pennsylvania, has ten manufacturing plants and 27 company-owned masonry supply centers located across the Northeast and Midwest.

Glen-Gery premium products include molded brick, glazed brick, klaycoat brick, handmade brick, thin brick and brick pavers. Brands manufactured by Glen-Gery include Sioux City Brick, Cushwa Brick and Lawrenceville Brick. In addition to brick, Glen-Gery is also known for its superior line of manufactured stone veneer, Landmark Stone, and unique selection of Wall Systems solutions and components. The company's comprehensive Wall Systems offering exemplifies classic brick aesthetics and permanence when traditional masonry is not an option with products like Tru-Brix® and Thin Tech®. In addition, their terracotta ceramic facade system, Terracade®, spans diverse architectural styles while enduring every weather extreme.

Andy Halsted, National Account Manager for Glen-Gery, is proud to be a part of the masonry industry's tight knit community where mutual support and collaboration are part of its culture. He also values sharing a common goal with other MIM members: expanding the footprint of masonry in new construction. He recommends those new to the MIM take the time to learn from and listen to other members.

"We make beautiful products that last forever," said Halsted. "Endless design possibilities and timeless beauty that outlasts all others."
