

MIM Member for Nearly 65 Years: St. Marys Cement Proudly Supplies Performance-Based Products

St Marys Cement, based in Detroit, is part of the North American operations of international building materials and sustainable solutions company, Votorantim Cimentos. Headquartered in Sao Paulo, Brazil, Votorantim Cimentos is one of the world's top 10 cement producers with operations in South America, Europe and North America.

Votorantim Cimentos North America (VCNA) supplies a full range of cement, concrete and aggregates to customers in the Great Lakes region, Eastern Canada and the northeastern United States. The company actively participates in industry-wide initiatives to lower the carbon footprint of cement and concrete for a more sustainable future.

St Marys Cement/Votorantim Cimentos is a proud supplier of performance-based products that include masonry cement. As a member of the MIM for nearly 65 years, the company is thankful for the many benefits the MIM offers. "From day one, we have leveraged our membership to network with owners, builders, trades and materials suppliers in the industry," said Bill Barker, masonry manager at St. Marys. "The strong relationships we have built over the years have been key to our ability to promote and continually improve our construction practices and projects."

For new members, Bill recommends active participation in the MIM and continued involvement. "It's extremely rewarding personally and professionally." As for his favorite thing about our industry, Bill was quick to respond that he appreciates both the product itself and the people who deliver lasting and beautiful results.
