Recognizing Bracy and Jahr

GREWCOCK STUDENT UNION- Hillsdale College

Architect: McCrery Architects, LLC
Engineer of Record: Spiegel Zamecnik & Shah, Inc.
Construction Manager: Weigand Construction, Inc.

Material Suppliers included Belden Brick for the brick
Masonry Accessories: Masonpro for a large portion of masonry accessories
Limestone: Custom Stone Works

JKI Engineering, Inc. provided the limestone anchorage design for the project (through CSW), and OIK Industries provided some of the large fabrications required for anchorage.

About the project from Bracy and Jahr

With the project came numerous challenges, starting with the location of the project itself. Located within the campus quad, space was at a premium, with access and mobility being limited, which made installing the limestone more complicated. The size and weight of some of the pieces further added to the complexity. Additionally, the installation and anchorage of some of the limestone at the coffered ceiling and portico required work a bit outside our norm, including some elaborate steel fabrications and a fair amount of welding. All in all, there were a lot of 'moving parts' (so to speak), whose delivery and installation had to be coordinated in order for the project to run smoothly and forward momentum maintained. The team we had on site did an excellent job of looking ahead to foresee any potential issues, and to utilize their expertise and experience, as well as some creativity, to solve them.

Thank you, Bracy and Jahr, for your contributions to and vision for the industry. The MIM will continue to spotlight members on our blog and on our social media channels. Please reach out to Anne Koch anne@masonryinfo.org if you would like to see your organization recognized.
